

**Intro to Coding & Coordinate Plane** – Refine coding skills and understand coordinate positioning for sprite manipulation.

**Variables & Conditional Statements** – Work with variables to store data and implement complex decision-making with conditional logic.

**Keyboard Controls & Functions** – Integrate keyboard inputs for interactive projects and create reusable functions to simplify code.

**Scratch Extensions: Pen & Video Sensing** – Use advanced Scratch extensions to enhance creativity with drawing tools and video-based interactions.

**Advanced Python Programming** – Learn more advanced concepts in Python programming for creating interactive and dynamic applications.
